Senior Full-Stack & AI/RAG Platform Engineer

Philippines (Remote / US clients)

9+ years architecting secure, scalable enterprise systems for U.S. clients. Proven track record modernizing legacy applications, engineering compliance-ready platforms (HIPAA, SOC, SIEM, Wazuh), and building cloud-native infrastructure on AWS. Increasingly specialized in applied AI: **RAG pipelines, hybrid vector/keyword search, LLM integration via MCP, and multi-agent systems** that turn raw operational data into real-time, actionable intelligence. Experienced leading and mentoring junior developers, setting coding standards, and driving architecture decisions across cross-functional teams.

CORE SKILLS

AI / LLM & Retrieval	LLM Integration (Claude/OpenAI/Gemini), RAG Pipelines , Hybrid RAG, MCP, Multi-Agent Orchestration, Prompt Engineering
Languages & Runtimes	Python, FastAPI, PHP, JAVA, Groovy, Node.js, TypeScript, C#, Bash
Frameworks	Laravel, Grails, Express.js, Next.js, React, Vue.js, ExtJS, Quasar, n8n
Data & Storage	MySQL, MongoDB, Redis, OpenSearch, Vector Search (k-NN)
Cloud & DevOps	AWS (EC2/Lambda/S3/CloudFormation), Docker, CI/CD, Digital Ocean, GraphQL, Git
Security & Compliance	SIEM/Wazuh, SOC Operations, HIPAA, RBAC, JWT Auth, API Security, Audit Logging

PROFESSIONAL EXPERIENCE

- **Senior Software Developer — Platform Architecture, AI & Security Engineering**
USX Cyber · Cybersecurity

JAN 2024 — PRESENT

- Architect and lead delivery of AI-powered cybersecurity modules, including a RAG pipeline with hybrid vector and keyword search (OpenSearch k-NN) powering an LLM-driven SOC analyst assistant for faster, more accurate alert triage.
 - Design and integrate LLM workflows (Claude, OpenAI, Gemini) via the Model Context Protocol (MCP); build reusable multi-tenant MCP servers exposing secure, scoped access to SharePoint, SIEM, and knowledge-base data.
 - Build production Python/FastAPI microservices to serve AI/RAG endpoints, orchestrate multi-agent workflows, and expose secure, documented APIs.
 - Develop automation workflows using n8n, AWS, Wazuh, and Spiceworks; define API standards, service boundaries, and data contracts.
 - Establish development standards and mentor junior developers on secure coding, API design, and AI/RAG integration patterns.
 - Design and implement RBAC, authentication, authorization, and security controls — secrets management, JWT auth, audit logging, rate-limiting.

Python · FastAPI · PHP · ReactJS · Drupal · Docker · AWS · CloudFormation · n8n · RAG · OpenSearch k-NN · MCP · CI/CD
- **Backend Game Developer**
FanYou PH Inc.

AUG 2023 — FEB 2024

- Managed game data — player data, statistics, in-game assets — and maintained server-side infrastructure for live titles under real-time load.
 - Developed gameplay logic with front-end programmers; built APIs and web services for client-server communication.
 - Key Projects (Box, MoWang, SkyStory): built an Express.js RESTful API server, WebSocket real-time chat/updates, and an NGINX-based microservice architecture.

PHP · TypeScript · Node.js · Express.js · WebSocket · C# · Redis
- **Senior Software Developer**
HEDY Philippines Inc.

AUG 2021 — JUL 2023

- Designed, developed, and implemented robust, scalable microservices architecture integrated with Drupal and Laravel-based systems.
 - Owned software testing, bug fixing, and technical documentation; integrated third-party APIs via OAuth2 M2M authentication.

PHP · Laravel 9 · MySQL · AWS · Drupal 10
- **Senior Software Developer**
StackTrek Enterprise Inc.

JUL 2019 — AUG 2021

- Troubleshoot, debugged, and resolved issues across microservices, APIs, and backend integrations; optimized API performance, scalability, and security.
 - Implemented and managed authentication/authorization across microservices — OAuth2, JWT, custom API keys.

PHP · Groovy on Grails · MySQL · Drupal
- **Software Developer**
Grow Forward JP Inc.

MAR 2018 — SEP 2018

- Developed and maintained front-end and back-end components with cross-browser, mobile-responsive delivery.
 - Integrated payment gateway APIs; troubleshoot and resolved production issues to minimize downtime.

PHP · MySQL · .NET · WordPress
- **Software Developer**
Hinduja Global Solutions

JUN 2015 — SEP 2017

- Led software deployment and Linux server configuration/tuning; worked with business analysts on tech stack decisions.
 - Project (Gamification & Centralized Info Blog Platform): built a Node.js/MongoDB blog platform with full CRUD REST APIs.

PHP · JAVA · Laravel 5 · Node.js · Python · MongoDB

EDUCATION

Bachelor of Science in Software Engineering
Central Philippine University — 2012
